## OBJECTIVE

---

Computer Science & Engineering graduate and an aspiring Data Analyst. I enjoy using Python, SQL, and Power BI to explore data and uncover insights that solve real-world problems. I am passionate to start my professional journey and strengthen my skills within a team where I can contribute impactful solution and learn.

## SKILLS

---

- **Technical Skills:**
  - Python (Pandas, NumPy, Matplotlib, Seaborn), Exploratory Data Analysis (EDA)
  - SQL (MySQL, Advanced Joins, CTEs, Subqueries, Window Functions)
  - Power BI (Basic DAX, Power Query, Data Modeling)
  - Microsoft Excel (Pivot Tables, XLOOKUP)
  - Machine Learning (Regression, Classification, Scikit-Learn), Statistical Analysis
- **Soft Skills:** Communication, Data Storytelling, Adaptability, Resilience, Continuous Learning

## PROJECTS

---

### Pizza Sales Analysis – (Power BI)

- **Analysis:** Identified a revenue variance of **12%** between July peak [**\$72.6k**] and October bottom [**\$64.0k**].
- **Growth & Solution:** For the solution of the variance, proposed a targeted recovery plan using **dynamic pricing** for off-peak months and Discount price promotions during Q3/Q4 to bridge the gap approximately **\$8.6K** revenue loss and stabilize cash flow for the year-around.

### Customer Shopping Behavior Analysis – (Power BI)

- **Analysis:** Almost half of the customers, approximately **1.7k** of **3.9k (43%)** are on Discount dependency.
- **Solution:** Implemented a 'Minimum purchase' strategy. Instead of a flat discount we proposed a minimum spend of **\$75** (where average spent is **\$59.8**) to trigger a smaller discount of **(10%)**. Even if **20%** customers leave, it would result in **14%** net increase in profit.

### Swiggy Sales Performance Analysis – (Microsoft Excel)

- **Analysis:** Analyzed 197K+ delivery logs (₹53M revenue) via Excel, pinpointed Tuesday revenue slumps and high geographic dependency in Bengaluru.
- **Solution:** Proposed B2B bundles to optimize mid-week logistics and a "Swiggy Green" filter to capture premium vegetarian market segments.

## CERTIFICATIONS

---

- Machine Learning Specialization — Stanford University (Coursera, 2025)
- Power BI for Beginner — SkillUp (Simplilearn, April 2026)
- Generative AI in Action: Real-World Use Cases — (AWS, Sep 2025)
- Data Science and Machine Learning — (Ostad, Ongoing)

## EDUCATION

---

**Bachelor of Science** — Daffodil International University

Major: Computer Science & Engineering (May 2019 – Sep 2024)
